ABOUT US

Computer Learning Centre (CLC) was established in 1994 in Kenya with a vision to build capacity in the Africa Region. Computer Learning Center is a reputed organization in IT and Business training across Middle East and Africa (MEA).

The Computer Learning Centre (CLC Training) is a training and educational institution that provides a wide range of IT and business-related courses. We specialize in delivering industry-recognized courses and focus on equipping individuals and organizations with cutting-edge skills.

At Computer Learning Center,We aim to empower individuals and organizations by enhancing their skills, helping professionals stay competitive in a fast-changing technological environment. Our training programs are tailored to meet the needs of both beginners and advanced learners, including corporate clients seeking to upskill their workforce.We offer certified trainings in Digital transformation in Cyber Security , Cloud , Virtualization , Artificial Intelligence (AI) . Machine Learning (ML) , Devops , Collaboration , Enterprise Networks , Data centre , Infrastructure , Server , Storage , Service Management , Project Management and Business processes etc .

AWS Training and Certification programs help individuals and organizations build and validate their cloud skills using Amazon Web Services (AWS). These programs offer various training options, including digital and classroom-based courses, to help learners gain practical cloud skills and prepare for AWS certifications.

ESSENTIALS	
AWS Technical Essentials	1 Day
AWS Cloud Practitioner Essentials	1 Day
Security Engineering on AWS	3 Days
Developing Generative AI Applications on AWS	2 Days
AWS Well-Architected Best Practices	1 Day
ASSOCIATE	
Designing and Implementing Storage on AWS	3 Days
Architecting on AWS	3 Days
Developing on AWS	3 Days
Cloud Operations on AWS	3 Days

TRAINING TRACK

Networking

Network Engineer
Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, etc.

AI/ML

Machine Learning Engineer
Research, build and design artificial intelligence (AI) systems to automate predictive models and design machine learning systems, models and schemes.

Security

Cloud Security Engineer
Design computer security architecture and develop detailed cyber security designs. Develop, execute and track performance of security measures to protect information.

Cloud Security Architect
Design and Implement enterprise cloud solutions applying governance to identify, communicate and minimize business and technical risks.

Development

Software Development Engineer
Develop, construct and maintain software across platforms and devices.

DevOps

Test Engineer
Embeded testing and quality best practices for software development from design to release throughout the product life cycle.

Cloud DevOps Engineer
Design, deployment and operations of large-scale global hybrid cloud computing environment, advocating for end-to-end automated CI/CD DevOps pipelines.

DevSecOps Engineer
Accelerate enterprise cloud adoption while enabling rapid and stable delivery capabilities using CI/CD principles, methodologies and technologies

Operations

Systems Administrator
Install, upgrade and maintain computer components and software and intergrate automation processes.

Cloud Engineer
Implement and operate an organization's networked computing infrastructure and implement security systems to maintain data safety.

Architecture

Solutions Architect
Design, develop and manage cloud infrastructure and assets, work with DevOps to migrate applications to the cloud.

Application Architect
Design significant aspects of application architecture including user interface, middleware and infrastructure and ensure enterprise-wide scalable, reliable and manageable systems.

CompTIA Authorized Partner | PLATINUM PARTNER

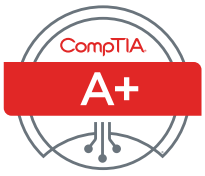
CERTIFICATIONS

IT Fundamentals (ITF+) covers a range of IT topics and provides a solid grounding in the technology concepts and practices organizations use today.



CompTIA A+ is the industry standard for launching IT careers into today's digital world.

CompTIA Network+ validates the core skills necessary to establish, maintain, troubleshoot and secure networks in any environment.

CompTIA Project+ is the only industry certification designed to teach IT pros the entry-level skills they need to successfully manage small to medium-sized projects.

CompTIA Advanced Security Practitioner (CASP+) is an advanced-level cybersecurity certification for security architects and senior security engineers.

CompTIA PenTest+ is for cybersecurity professionals tasked with penetration testing and security consulting.

CompTIA Linux+ validates the competencies required of an early career systems administrator supporting Linux systems.

CompTIA Cloud Essentials+ is for both IT and non-technical professionals who require the essential business acumen needed to make informed cloud service decisions.

CompTIA Cybersecurity Analyst (CySA+) is a certification for cyber professionals tasked with incident detection, prevention and response through continuous security monitoring.

CompTIA Security+ is a global certification that validates the baseline skills necessary to perform core security functions and pursue an IT security career.

covers mobile device management, troubleshooting, security such as remote access concerns and threat mitigation, and network infrastructure.

CompTIA Cloud+ validates the essential skills to implement, maintain, optimize and troubleshoot cloud-based infrastructure services.

ORACLE®

These programs are designed to educate individuals on Oracle's various products and technologies, including databases, cloud computing, and other enterprise software. This training can range from introductory courses to advanced certificationst.

ITIL®

ITIL is the most widely used global best practice framework for the management of IT and digitally enabled products and services.

Discover how ITIL can enhance your career with certifications tailored to professionals like you who aspire to stand out and be successful in this competitive field.

PRINCE2®

The PRINCE2 portfolio is a collection of globally used best practice guidance and techniques for successful project, programme and portfolio management.

Discover how PRINCE2 certifications can advance your career with structured, easy-to-follow methods for addressing contemporary organisational challenges.

DEVOPS INSTITUTE

The DEVOPS INSTITUTE portfolio includes the most widely used certifications for DevOps skills, as well as in demand AI, data, analytics and software development skills.

Discover how you can facilitate collaboration between Dev and Ops teams with DevOps practices, accelerating the delivery of high-quality products.

PeopleCert Lean 6σ IASSC

IASSC Lean Six Sigma

Lean Six Sigma is a process improvement programme. It combines Lean, which focuses on speed, efficiency and removing waste from the process and Six Sigma, which aims to improve effectiveness and reduce errors.

SDI Service Desk Institute

The Service Desk Institute's internationally recognised standards for service desk and IT support professionals set out clear definitions for the key service desk roles and form the basis of the two exceptional qualifications - Service Desk Analyst (SDA) and Service Desk Manager (SDM).

PMP, or Project Management Professional, certification is a globally recognized credential validating expertise in project management principles and practices. Awarded by the Project Management Institute (PMI)

PROJECT MANAGEMENT COURSES

Fundamentals of Project Management:

Covers core concepts like project planning, execution, monitoring, and control.
Project Management Methodologies:
You'll learn about different frameworks like Waterfall, Agile, and Scrum.
Project Management Tools:
This may include learning about software for planning, scheduling, and tracking projects.
Exam Preparation:
Courses often include dedicated modules or sections to help you prepare for the certification exam, including practice questions and exam strategies.

PMP · CAPM · PMI-PBA · PgMP · PfMP · PMI-RMP · PMI-SP · PMI PROJECT MANAGEMENT READY

WHY CERTIFY?

This structured learning program designed to equip individuals with the knowledge, skills, and tools necessary to effectively plan, execute, and manage projects. PMI is the leading global organization in project management, and its courses cover various aspects of project management, including planning, scheduling, resource allocation, risk management, and more.

PECB
BEYOND RECOGNITION

The educational programs and certification courses offered by the Professional Evaluation and Certification Board (PECB). PECB is a certification body that provides training, examination, and certification services across various disciplines. They focus on helping professionals demonstrate competence and commitment through internationally recognized standards.
