NSE 1 - The Threat Landscape

NSE 1 is the entry-level designation of the Fortinet Network Security Expert (NSE) program.

It is intended to provide a basic understanding of today's **threat landscape.**

Format

- Self-paced animated videos and quizzes
- Fortinet's Quarterly Threat Report (PDF)

Agenda

1. The Bad Actors
2. CIO Perspectives
3. CISO Perspectives
4. CFO Perspectives
5. Personal Security Awareness
6. Key Cybersecurity Terms – Attack Surface

Objectives

After completing NSE 1, candidates will have a general understanding of the following:

- Who is behind these attacks
- The motives of the attackers
- How some attacks are carried out
- How attacks impact C-level executives
- Key strategies to remain safe on the Internet
- Key cybersecurity terms

Who Should Attend?

This course is open for **free** enrollment for anyone who wants to learn about the threat landscape and network security.

Prerequisites

There is no prerequisite to take this training.

System Requirements

If you take an online format of this class, you must have a computer with:

- High-speed Internet connection
- Up-to-date web browser
- Speakers / headphones
- Either:
  o HTML 5 support **or**
  o Up-to-date Flash runtime environment

Wired Ethernet connection (**not Wi-Fi**) recommended. **Firewalls including Windows Firewall or FortiClient must allow connections with the online course.**

Certification

This course completes the requirement to obtain the NSE 1 certification level.
The NSE 1 certification is valid for two years from the date of completion.
