MySQL8.0 for DatabaseAdministrators

Contents

1 Introduction to MySQL
Objectives 1-2
Course Goals 1-3
Course Lesson Map 1-5
Introductions 1-6
Classroom Environment 1-7
MySQL Powers the Web 1-8
MySQL Market Share: DB-Engines 2019 1-9
MySQL Enterprise Edition 1-10
Oracle Premier Support for MySQL 1-11
MySQL and Oracle Integration 1-12
MySQL Websites 1-13
Community Resources 1-14
Oracle University: MySQL Training 1-15
MySQL Certification 1-16
Summary 1-17
Practices 1-18

2 Installing and Upgrading MySQL
Objectives 2-2
Topics 2-3
Installation Sequence 2-4
Installing MySQL from Downloaded Packages 2-5
MySQL RPM Installation Files for Linux 2-6
MySQL RPM Installation Process 2-7
MySQL DEB Installation 2-8
Linux Distribution–Specific Repositories 2-9
Installing MySQL by Using a Package Manager 2-10
Adding a Yum Repository 2-11
Configuring Yum Repository Versions 2-12
Adding an APT Repository 2-13
Configuring Repository Versions 2-14
Manually Configuring the APT Repositories 2-15
Installing MySQL on Windows 2-16
Installing on Windows: MySQL Installer 2-17

Installing on Windows: Selecting Products and Features 2-18
Installing on Windows: Product Configuration 2-19
Installing MySQL as a Windows Service 2-20
Installing MySQL from Source 2-21
Installing MySQL from Binary Archive 2-22
Deploying MySQL Server with Docker 2-25
Quiz 2-27
Topics 2-28
Linux MySQL Server Installation Directories 2-29
Windows MySQL Server Installation Directory 2-30
MySQL Programs 2-31
mysqld: MySQL Server Process 2-32
Installation Programs 2-33
Utility Programs 2-34
mysql_config_editor 2-35
.mylogin.cnf Format 2-36
Login Paths 2-37
Command-Line Client Programs 2-38
Launching Command-Line Client Programs 2-39
Topics 2-40
Configuring Mandatory Access Control 2-41
SELinux Example 2-42
AppArmor: Example 2-43
Changing the root Password 2-44
Using mysqladmin to Change the root Password 2-45
Quiz 2-46
Topics 2-47
Starting and Stopping MySQL 2-48
Stopping MySQL with mysqladmin 2-49
MySQL Service Files 2-50
Starting and Stopping MySQL on Windows 2-51
Starting and Stopping MySQL on Windows: MySQL Notifier 2-52
Topics 2-53
Upgrading MySQL 2-54
Reading Release Notes 2-55
MySQL Shell Upgrade Checker Utility 2-56
Using In-Place Upgrade Method 2-57
Using Logical Upgrade Method 2-58
mysql_upgrade 2-59
Summary 2-60
Practices 2-61

3 Understanding MySQL Architecture
Objectives 3-2
Topics 3-3
Architecture 3-4
Client/Server Connectivity 3-5
MySQL Server Process 3-6
Terminology 3-7
Server Process 3-8
Topics 3-9
Connection Layer 3-10
Connection Protocols 3-11
Local and Remote Connection Protocol: TCP/IP 3-12
Local Connection Protocol in Linux: Socket 3-13
MySQL and localhost 3-14
Local Connection Protocols in Windows: Shared Memory and Named Pipes 3-15
SSL by Default 3-16
Connection Threads 3-17
Quiz 3-18
Topics 3-19
SQL Layer 3-20
SQL Layer Components 3-21
SQL Statement Processing 3-22
Topics 3-23
Storage Layer 3-24
Storage Engines Provided with MySQL 3-25
Storage Engines: Function 3-26
SQL and Storage Layer Interactions 3-27
Features Dependent on Storage Engine 3-28
InnoDB Storage Engine 3-30
MyISAM Storage Engine 3-31
MEMORY Storage Engine 3-32
ARCHIVE Storage Engine 3-33
NDBCluster Storage Engine 3-34
BLACKHOLE Storage Engine 3-35
Storage Engines Feature Summary 3-36
How MySQL Uses Disk Space 3-38
Data Directory 3-39
Topics 3-40
What Is a Data Dictionary? 3-41
Types of Metadata 3-42

Data Dictionary in Earlier Versions of MySQL 3-43
Transactional Data Dictionary in MySQL 8 3-44
Transactional Data Dictionary: Features 3-45
Serialization of the Data Dictionary 3-46
Dictionary Object Cache 3-47
Topics 3-48
InnoDB Tablespaces 3-49
InnoDB System Tablespace 3-50
File-per-Table Tablespaces 3-51
General Tablespaces 3-52
Choosing Between File-Per-Table and General Tablespaces 3-53
Locating Tablespaces Outside the Data Directory 3-54
Temporary Tablespaces 3-55
Topics 3-56
Redo Logs 3-57
Undo Logs 3-59
Undo Tablespaces 3-61
Temporary Table Undo Log 3-62
Quiz 3-63
Topics 3-64
How MySQL Uses Memory 3-65
Global Memory 3-67
Session Memory 3-68
Log Files and Buffers 3-69
InnoDB Buffer Pool 3-70
Configuring the Buffer Pool 3-71
Topics 3-72
MySQL Plugin Interface 3-73
MySQL Component Interface 3-74
Summary 3-75
Practices 3-76

4 Configuring MySQL
Objectives 4-2
Topics 4-3
MySQL Configuration Options 4-4
Deciding When to Use Options 4-5
Displaying Configured Server Options 4-6
Option Naming Convention 4-7
Using Command-Line Options 4-8
Topics 4-9

Reasons to Use Option Files 4-10
Option File Locations 4-11
Option Files That Each Program Reads 4-12
Standard Option Files 4-13
Option File Groups 4-14
Option Groups That Each Program Reads 4-15
Option Group Names 4-16
Client Options: Examples 4-17
Writing Option Files 4-18
Option File Contents: Example 4-19
Option Precedence in Option Files 4-20
Loading or Ignoring Option Files from the Command Line 4-21
Loading Option Files with Directives 4-22
Displaying Options from Option Files 4-23
Quiz 4-24
Topics 4-25
Server System Variables 4-26
System Variable Scope: GLOBAL and SESSION 4-27
Dynamic System Variables 4-28
Changing Variable Values 4-29
Persisting Global Variables 4-30
Displaying System Variables 4-31
Viewing Variables with Performance Schema 4-32
Topics 4-34
Launching Multiple Servers on the Same Host 4-35
Settings That Must Be Unique 4-36
mysqld_multi 4-37
mysqld_multi: Example Configuration File 4-38
systemd: Multiple MySQL Servers 4-39
Quiz 4-40
Summary 4-41
Practices 4-42

5 Monitoring MySQL
Objectives 5-2
Topics 5-3
Monitoring MySQL with Log Files 5-4
Log File Characteristics 5-5
Error Log 5-6
Binary Log 5-7
General Query Log 5-8

General Query Log: Example 5-9
Slow Query Log 5-10
Slow Query Log: Logging Administrative and Replicated Statements 5-11
Filtering Slow Query Log Events 5-12
Slow Query Log: Example 5-13
Viewing the Slow Query Log with mysqldumpslow 5-14
mysqldumpslow: Example 5-15
Specifying TABLE or FILE Log Output 5-16
Log File Rotation 5-17
Flushing Logs 5-18
Quiz 5-19
Topics 5-20
Status Variables 5-21
Displaying Status Information 5-22
Monitoring Status with mysqladmin 5-23
Topics 5-24
Performance Schema 5-25
Performance Schema Table Groups 5-26
Configuring Performance Schema 5-27
Performance Schema Setup Tables 5-28
Performance Schema Instruments 5-29
Top-Level Instrument Components 5-30
Accessing Performance Schema Metrics 5-31
The sys Schema 5-32
Using the sys Schema Example 1 5-33
Using the sys Schema: Example 2 5-36
Topics 5-37
MySQL Enterprise Audit 5-38
Installing MySQL Enterprise Audit 5-39
Audit Log File Configuration 5-40
Audit Log Filtering 5-41
Audit Log Filter Definitions 5-42
Audit Log File Format 5-43
Audit Log File: New-Style XML Format 5-44
Audit Log File: JSON Format 5-45
Audit Record Values 5-46
Quiz 5-47
Topics 5-48
MySQL Enterprise Monitor 5-49
Installing MySQL Enterprise Monitor 5-50
Installing the Service Manager 5-51

Post-Installation Configuration 5-53
Installing Agents 5-54
MySQL Enterprise Monitor: Managing Multiple Servers 5-55
MySQL Enterprise Monitor: Timeseries Graphs 5-56
MySQL Enterprise Monitor: Advisors 5-57
MySQL Enterprise Monitor: Events 5-58
Topics 5-59
SHOW PROCESSLIST 5-60
Performance Schema Threads Table 5-61
Killing Processes 5-62
Limiting User Activity 5-63
Setting Resource Limits 5-64
Resetting Limits to Default Values 5-65
Summary 5-66
Practices 5-67

6 Managing MySQL Users
Objectives 6-2
Topics 6-3
Importance of User Management 6-4
Authentication and Authorization 6-5
User Connection and Query Process 6-6
Viewing User Account Settings 6-7
Pluggable Authentication 6-8
Local Connection 6-9
Remote Connection 6-10
Topics 6-11
Account Names 6-12
Host Name Patterns 6-13
Creating a User Account 6-14
Roles 6-15
Creating a Role 6-16
Manipulating User Accounts and Roles 6-17
Topics 6-18
Setting the Account Password 6-19
Dual Password Support 6-20
Expiring Passwords Manually 6-21
Configuring Password Expiration 6-22
Changing Expired Passwords 6-23
Quiz 6-24
Topics 6-25

Pluggable Authentication 6-26
Cleartext Client-Side Authentication Plugin 6-27
Loadable Authentication Plugins 6-28
Enterprise Authentication Plugins 6-29
PAM Authentication Plugin 6-30
Configuring the PAM Authentication Plugin 6-31
Creating Users that Authenticate with PAM 6-32
Creating PAM Proxied Users 6-33
Logging In with PAM Accounts 6-34
Topics 6-35
Authorization 6-36
Determining Appropriate User Privileges 6-37
Privilege Scope 6-38
Granting Administrative Privileges 6-39
Dynamic Privileges 6-40
Special Privileges 6-41
GRANT Statement 6-42
Granting Permissions on Columns 6-43
Granting Roles to Users 6-44
Displaying GRANT Privileges 6-45
Displaying Privileges for Another User 6-46
Displaying Privileges for a Role 6-47
Revoking Account Privileges 6-48
REVOKE: Examples 6-49
Partial Revoke 6-51
User Privilege Restrictions 6-52
Quiz 6-53
Topics 6-54
Using Role Privileges 6-55
Activating Roles at Server Level 6-56
Activating Roles at User Level 6-57
Activating Roles at Session Level 6-58
Mandatory Roles 6-59
Topics 6-60
Grant Tables 6-61
Grant Table Contents 6-62
Use of Grant Tables 6-63
Effecting Privilege Changes 6-64
Summary 6-65
Practices 6-66

7 Securing MySQL
Objectives 7-2
Topics 7-3
Security Risks 7-4
MySQL Installation Security Risks 7-5
Topics 7-6
Securing MySQL from Public Networks 7-7
Preventing Network Security Risks 7-8
Securing MySQL in Private Networks 7-9
Topics 7-10
Secure Connections 7-11
Secure Connection: Overview 7-12
Generating a Digital Certificate 7-13
Server Security Defaults 7-14
SSL Is Enabled by Default with MySQL Clients 7-15
Disabling SSL on MySQL Server 7-16
Setting Client Options for Secure Connections 7-17
Client --ssl-mode Option: Example 7-18
Setting the Permitted Versions for SSL/TLS for the Server 7-19
Setting the Permitted Versions for SSL/TLS for the Client 7-20
Setting the Cipher to Use for Secure Connections 7-21
Global System Variable and Session Status Variables for Ciphers 7-22
Cipher System and Status Variables: Example 1 7-23
Cipher System and Status Variables: Example 2 7-24
Setting Client SSL/TLS Options by User Account 7-25
Generating a Digital Certificate 7-26
SSL Server Variables for Digital Certificates 7-27
SSL Client Options for Digital Certificates 7-28
Securing a Remote Connection to MySQL 7-29
Quiz 7-30
Topics 7-31
Preventing MySQL Password Security Risks 7-32
How Attackers Derive Passwords 7-33
Password Validation Component 7-34
Validate Password Component Variables 7-35
Changing the Default Password Validation Variables 7-36
Other Password Considerations 7-37
Locking an Account 7-38
Pluggable Authentication 7-39
Preventing Application Password Security Risks 7-40

Connection-Control Plugin 7-41
Installing the Connection-Control Plugin 7-42
Monitoring Connection Failures 7-43
Using the CONNECTION_CONTROL_FAILED_LOGIN_ATTEMPTS Plugin 7-44
Quiz 7-45
Topics 7-46
Limiting Operating System Usage 7-47
Limiting Operating System Accounts 7-48
Operating System Security 7-49
File System Security 7-50
Preventing File System Security Risks 7-51
Topics 7-52
Keyring 7-53
Deploying a Keyring 7-54
Key Management Functions 7-55
Encrypting InnoDB Tablespaces 7-56
Encrypting InnoDB Redo Logs and Undo Logs 7-57
InnoDB Encryption Keys 7-58
Encrypting Binary Log and Relay Log 7-59
Binary Log Encryption Keys 7-60
Topics 7-61
Protecting Your Data from SQL Injection Attacks 7-62
SQL Injection: Example 7-63
Detecting Potential SQL Injection Attack Vectors 7-64
Preventing SQL Injection Attacks 7-65
Topics 7-66
MySQL Enterprise Firewall 7-67
Enterprise Firewall Plugins 7-68
Enterprise Firewall Database Components 7-69
Installing MySQL Enterprise Firewall 7-70
Registering Accounts with the Firewall 7-71
Training the Firewall 7-72
Statement Digests 7-73
Enabling Firewall Protection 7-74
Disabling the Firewall 7-75
Monitoring the Firewall 7-76
Quiz 7-77
Summary 7-78
Practices 7-79

8 Maintaining a Stable System
Objectives 8-2
Topics 8-3
Stable Systems 8-4
Measuring What You Manage 8-5
Establishing a Baseline 8-6
Application Profiling 8-7
Topics 8-8
Asking “What Could Go Wrong?” 8-9
Components in a MySQL Server Installation 8-10
Server Hardware 8-11
Problems with Hardware 8-12
Virtualized Environment 8-13
Operating System 8-14
Coexistent Applications 8-15
Network Failures 8-16
Application Failures 8-17
Force Majeure 8-18
Topics 8-19
Capacity Planning 8-20
Monitoring Table Size 8-21
Calculating Logical Size: Data and Indexes 8-22
Calculating Physical Size: Querying Information Schema 8-23
Calculating Physical Size: Reading the File System 8-24
Scalability 8-25
Scaling Up and Scaling Out 8-26
Quiz 8-27
Topics 8-28
Establishing the Nature of a Problem 8-29
Identifying the Problem 8-30
Common Problems 8-31
Resolving Problems 8-32
Topics 8-33
Identifying the Causes of Server Slowdowns 8-34
Investigating Slowdowns 8-35
Quiz 8-36
Topics 8-37
How MySQL Locks Rows 8-38
Identifying Lock Contention 8-39
InnoDB Table Locks 8-40
InnoDB Row Locks 8-41

Troubleshooting Locks by Using SHOW PROCESSLIST 8-42
Monitoring Data Locks with Information Schema and Performance Schema 8-43
Information Schema INNODB_TRX View 8-44
Performance Schema data_locks Table 8-45
Performance Schema data_lock_waits Table 8-47
sys.innodb_lock_waits View 8-48
sys.innodb_lock_waits: Example Query 8-49
Performance Schema metadata_locks Table 8-50
sys.schema_table_lock_waits View 8-51
Topics 8-52
InnoDB Recovery 8-53
Using --innodb_force_recovery 8-54
Summary 8-55
Practices 8-56

9 Optimizing Query Performance
Objectives 9-2
Topics 9-3
Identifying Slow Queries 9-4
Choosing What to Optimize 9-5
Topics 9-6
Using EXPLAIN to See Optimizer's Choice of Index 9-7
EXPLAIN: Example 9-8
EXPLAIN Output 9-9
Common type Values 9-11
Displaying Query Rewriting and Optimization Actions 9-12
EXPLAIN Example: Table Scan 9-13
EXPLAIN Example: Primary Key 9-14
EXPLAIN Example: Non-unique Index 9-15
EXPLAIN and Complex Queries 9-16
EXPLAIN Example: Simple Join 9-17
Explanation of Simple Join Output 9-18
EXPLAIN FORMAT 9-19
EXPLAIN FORMAT: JSON Example 9-20
EXPLAIN ANALYZE 9-21
Hash Join Optimization 9-22
Topics 9-23
Index Types 9-24
Creating Indexes to Improve Query Performance 9-25
Creating Indexes on Existing Tables 9-26
Dropping Indexes on Existing Tables 9-27

Displaying Indexes Metadata 9-28
Invisible Indexes 9-29
Topics 9-30
Maintaining InnoDB Index Statistics 9-31
Automatically Updating Index Statistics 9-32
Using ANALYZE TABLE 9-33
Rebuilding Indexes 9-34
mysqlcheck Client Program 9-35
Histograms 9-36
Example: The Query 9-37
Example: Creating a Histogram 9-38
Example: The Query with Histogram Data 9-39
Topics 9-40
MySQL Query Analyzer 9-41
Query Response Time Index 9-42
Query Analyzer User Interface 9-43
Quiz 9-44
Summary 9-45
Practices 9-46

10 Choosing a Backup Strategy
Objectives 10-2
Topics 10-3
Reasons to Back Up 10-4
Backup Types 10-5
Hot Backups 10-6
Cold Backups 10-7
Warm Backups 10-8
Quiz 10-9
Topics 10-10
Backup Techniques 10-11
Logical Backups 10-12
Logical Backup Conditions 10-14
Logical Backup Performance 10-15
Physical Backups 10-16
Physical Backup Files 10-17
Physical Backup Conditions 10-18
Online Disk Copies 10-19
Snapshot-Based Backups 10-20
Performing a Snapshot 10-21
Replication-Based Backups 10-22

Binary Log Backups 10-23
Binary Logging and Incremental Backups 10-24
Quiz 10-25
Topics 10-26
Comparing Backup Methods 10-27
Deciding a Backup Strategy 10-28
Backup Strategy: Decision Chart 10-29
More Complex Strategies 10-30
Summary 10-31
Practices 10-32

11 Performing Backups
Objectives 11-2
Topics 11-3
Backup Tools: Overview 11-4
Topics 11-5
MySQL Enterprise Backup 11-6
MySQL Enterprise Backup: Storage Engines 11-7
MySQL Enterprise Backup: InnoDB Files 11-8
MySQL Enterprise Backup: Non-InnoDB Files 11-9
Full Backups 11-10
Single-File Backups 11-11
Backup Process 11-12
Incremental Backups 11-13
Differential Backups 11-14
Validate Operations 11-15
Restore Operations 11-16
Restore Commands 11-17
Restoring Incremental Backups 11-18
Update Operations 11-19
Single-File Operations 11-20
Basic Privileges Required for MySQL Enterprise Backup 11-21
Granting Required Privileges 11-22
Quiz 11-23
Topics 11-24
mysqldump and mysqlpump 11-25
mysqldump 11-26
Ensuring Data Consistency with mysqldump 11-27
mysqldump Options for Creating Objects 11-28
mysqldump Options for Dropping Objects 11-29
mysqldump General Options 11-30

Restoring mysqldump Backups 11-31
Using mysqlimport 11-32
Privileges Required for mysqldump 11-33
Privileges Required for Reloading Dump Files 11-34
mysqlpump 11-35
Specifying Objects to Back Up with mysqlpump 11-36
Parallel Processing with mysqlpump 11-37
Quiz 11-38
Topics 11-39
Physical InnoDB Backups: Overview 11-40
Portability of Physical Backups 11-41
Physical InnoDB Backup Procedure 11-42
Recovering from Physical InnoDB Backups 11-43
Using Transportable Tablespaces for Backup 11-44
Transportable Tablespaces: Copying a Table to Another Instance 11-45
Physical MyISAM and ARCHIVE Backups 11-46
Physical MyISAM and ARCHIVE Backup Procedure 11-47
Recovering from Physical MyISAM or Archive Backups 11-48
LVM Snapshots 11-49
LVM Backup Procedure 11-50
Backing Up Log and Status Files 11-51
Topics 11-52
Replication as an Aid to Backup 11-53
Backing Up from a Replication Slave 11-54
Backing Up from Multiple Sources to a Single Server 11-55
Topics 11-56
Processing Binary Log Contents 11-57
Selective Binary Log Processing 11-58
Point-in-Time Recovery 11-59
Configuring MySQL for Restore Operations 11-60
Quiz 11-61
Summary 11-62
Practices 11-63

12 Configuring a Replication Topology
Objectives 12-2
Topics 12-3
MySQL Replication 12-4
Replication Masters and Slaves 12-5
Relay Slaves 12-6
Complex Topologies 12-7

Quiz 12-8
Topics 12-9
Replication Conflicts 12-10
Replication Conflicts: Example Scenario with No Conflict 12-11
Replication Conflicts: Example Scenario with Conflict 12-12
Topics 12-13
Replication Use Cases 12-14
Replication for Horizontal Scale-Out 12-15
Replication for Business Intelligence and Analytics 12-16
Replication for Geographic Data Distribution 12-17
Replicating with the BLACKHOLE Storage Engine 12-18
Replication for High Availability 12-19
Topics 12-20
Configuring Replication 12-21
Configuring Replication Masters 12-22
Configuring Replication Slaves 12-23
CHANGE MASTER TO 12-24
Finding Log Coordinates 12-25
Global Transaction Identifiers (GTIDs) 12-26
Identifying the Source Server 12-27
Logging Transactions 12-28
Replication with GTIDs 12-29
Replication Filtering Rules 12-30
Applying Filtering Rules 12-31
Quiz 12-32
Topics 12-33
Binary Log Formats 12-34
Row-Based Binary Logging 12-35
Statement-Based Binary Logging 12-36
Mixed Format Binary Logging 12-37
Replication Logs 12-38
Crash-Safe Replication 12-39
Topics 12-40
Asynchronous Replication 12-41
Semisynchronous Replication 12-42
Advantages and Disadvantages of Semisynchronous Replication 12-43
Enabling Semisynchronous Replication 12-44
Multi-Source Replication 12-45
Configuring Multi-Source Replication for a GTID-Based Master 12-46
Configuring Multi-Source Replication for a Binary Log Based Master 12-47
Controlling Slaves in a Multi-Source Replication Topology 12-48

Topics 12-49
MySQL Clone Plugin 12-50
Installing the Clone Plugin 12-51
Granting Permissions to Users 12-52
Cloning Local Data 12-53
Cloning Remote Data 12-54
Cloning for Replication 12-55
Clone Plugin Limitations 12-56
Summary 12-57
Practices 12-58

13 Administering a Replication Topology
Objectives 13-2
Topics 13-3
Failover with Log Coordinates 13-4
Potential Problems When Executing a Failover with Log Coordinates 13-5
Avoiding Problems When Executing a Failover with Log Coordinates 13-6
Failover with GTIDs 13-7
Topics 13-8
Replication Threads 13-9
The Master's Binlog Dump Thread 13-10
Single-Threaded Slaves 13-11
Multithreaded Slaves 13-12
Controlling Slave Threads 13-13
Resetting the Slave 13-14
Quiz 13-15
Topics 13-16
Monitoring Replication 13-17
Slave Thread Status 13-18
Master Log Coordinates 13-19
Relay Log Coordinates 13-20
Replication Slave I/O Thread States 13-21
Replication Slave SQL Thread States 13-24
Monitoring Replication by Using Performance Schema 13-26
Replication Tables in Performance Schema 13-27
MySQL Enterprise Monitor Replication Dashboard 13-28
Topics 13-29
Troubleshooting MySQL Replication 13-30
Examining the Error Log 13-32
SHOW SLAVE STATUS Error Details 13-34
Checking I/O Thread States 13-35

Monitoring Multi-Source Replication 13-36
Summary 13-37
Practices 13-38

14 Achieving High Availability with MySQL InnoDB Cluster
Objectives 14-2
Topics 14-3
What Is MySQL InnoDB Cluster? 14-4
Architecture 14-5
MySQL Group Replication Plugin 14-6
How Group Replication Works 14-7
Single-Primary Mode 14-8
Multi-Primary Mode 14-9
Conflict Resolution 14-10
Consensus and Quorum 14-11
Use Cases 14-12
Group Replication: Requirements and Limitations 14-13
Quiz 14-14
Topics 14-15
MySQL Shell (mysqlsh) 14-16
Using MySQL Shell to Execute a Script 14-17
MySQL Router (mysqlrouter) 14-18
Topics 14-19
Deployment Scenarios 14-20
Deploying Sandbox Instances and Creating the Cluster 14-21
Production Deployment 14-22
Distributed Recovery 14-23
Connecting Clients to the Cluster 14-24
Quiz 14-25
Topics 14-26
Managing Sandbox Instances 14-27
Checking the Status of a Cluster 14-28
Viewing the Structure of a Cluster 14-29
Checking the State of an Instance 14-30
Updating a Cluster Metadata 14-31
Removing Instances from the Cluster 14-32
Rejoining an Instance to the Cluster 14-33
Restoring Quorum Loss 14-34
Recovering the Cluster from a Major Outage 14-35
Dissolving a Cluster 14-36
Disabling super_read_only 14-37

Customizing a MySQL InnoDB Cluster 14-38
Customizing an Instance 14-39
Configuring Secure Connection in a Cluster 14-40
Creating a Server Whitelist 14-41
Summary 14-42
Practices 14-43

15 Conclusion
Course Goals 15-2
Oracle University: MySQL Training 15-4
MySQL Websites 15-5
Your Evaluation 15-6
Thank You 15-7
Q&A Session 15-8
